Chairman Ptak began the discussion in regards to the City Hall Roofing Replacement project. He has sat in during the discussion of the roof replacement. The city had originally planned on replacing the current shingle with asphalt shingles. The synthetic slate would keep the integrity of the building and the look of the historical building that it is. The synthetic shingles do come with a 50-year warranty. Alderman Lavieri did question if the city is considered the homeowner because Ecostar does mention a 50-year warranty for the homeowner. The City will verify this. The asphalt shingles have a 40-year warranty which the committee believes to be a stretch for the asphalt shingles.

Alderman Herndon does want to keep the historic charm and integrity of the building that it is. He believes it would be a good choice to go with the synthetic slate.

Moved by Alderman Herndon and seconded by Alderman Thompson to approve the request regarding using synthetic slate roofing for the City Hall Roofing Replacement Project.

Alderman Jeppson did question if it was something the city can afford. Chairman Ptak did mention the original bid came in lower than the Council appropriated for.

Chairman Ptak also believed that the copper valley, hip, and edge flashings are also necessary to keep the integrity of the historic building. The original bid was for all parts of replacement to be aluminum. Chairman Ptak is looking to replace the exposed areas with copper and all other valleys that are not exposed will be replaced with aluminum.

Moved by Alderman Herndon and seconded by Alderman Lavieri to approve the alternate bid of \$16,900 from Sterling Commercial Roofing for provisions of copper valley, hip, and ridge flashings.
